Quick Check Test (QCT)

Author: JvR Psychometrics

PURPOSE	To measure a participant's accuracy when checking
ADMINISTER TO	Individuals 18 years and older
READING/EDUCATIONAL LEVEL	Grade 12
ADMINISTRATION TIME	10-15 minutes (42 items)
SCORING OPTIONS	JvR Online/Data-capturing by Client Services
PUBLICATION DATE	2013
HPCSA	To be submitted
TRAINING	None
LANGUAGES	English
SA NORMS	Yes

The QCT is designed to measure a participant's checking accuracy. Participants are presented with detail orientation pairs of words, numbers and a combination of both words and numbers. Participants are asked to determine whether the pairs are identical or not. An accurate detail checking ability is important for jobs that require individuals to have a high level of detail orientation. s

It is important for organisations to select participants who have a high level of detail checking accuracy when that specific job calls for participants to be able to identify, as well as, rectify mistakes. Participants with a below average detail checking ability score are less likely to be able to accurately check detail oriented work. Participants who have an above average detail checking ability score are more likely to recognise mistakes.

ASSESSMENT AREAS

The Quick Check Test assesses participants in 3 areas:

Word Checking: Similarities and differences between words alone

Number Checking: Similarities and differences between numbers alone

Combination Checking: Similarities and differences between a combination of both words and numbers

AREAS OF APPLICATION

The QCT is useful for the following purposes:

- Screening
- Recruitment and Selection
- Research

REPORT OPTIONS:

The QCT has the following software report available:

- Quick Check Test Individual Profile Report: This report provides a candidate with an overall detail checking ability result categorised as 'below average checking ability (Stanine 1 – 3)'; 'average checking ability (Stanine 4 – 6)'; and 'above average checking ability (Stanine 7 – 9)'. The amount of time the candidate took to complete the assessment, as well as the participants percentile score, is also given to aid in the decision making process.
